## The Best Wrist Blood Pressure Monitor.

This wrist blood pressure monitor earned The Best rating from the Hammacher Schlemmer Institute because it was the most accurate and the easiest to use. The monitor's systolic and diastolic readings were compared to those taken by a cardiology nurse, and The Best model recorded a 95% accuracy rate—the highest of any monitor. The Best model uses the oscillometric method, a technique recommended by the American Heart Association for its accurate readings for hypertension and arrhythmia. The Best Wrist Blood Pressure Monitor has large, easy-to-read numbers on its LCD and color-coded indicators that allow you to quickly determine where results fall on the World Health Organization's guidelines. It has irregular heart beat detection and stores 399 readings for up to three users (1,197 total). Powered by a rechargeable battery that recharges via the included USB/AC adapter. Fits wrists 5 1/4"-8 1/2" in diameter. 3" L x 2 3/4" W x 1" D. (3 1/3 oz.)
